# Douglas County Recycling Newsletter

## Area Hazardous Waste Collection Events

Questions about Douglas County Recycling or hazardous waste? Contact Jen at: [jbarton@nwrpc.com](mailto:jbarton@nwrpc.com), 715-635-2197, or check out the website at: [www.douglascountywi.org](http://www.douglascountywi.org)

**REMEMBER,**

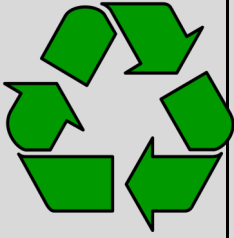

you can use any of the HHW collections, not just the one in your particular county.

**Most items accepted at the HHW Events are FREE of charge for residents. Please contact Jen at: [jbarton@nwrpc.com](mailto:jbarton@nwrpc.com), or 715-635-2197 for more information.**

		<b>Shell Lake</b> - parking lot behind Elliot Building 110 4th Ave.	2:00 pm – 3:00 pm

**Lead Tackle and Shot to be Collected**

Lead tackle and shot can be a real problem to animals and the environment. NW Regional Planning Commission has decided to do something about this and will now be collecting lead tackle/shot at all Household Hazardous Waste (HHW) Collection Events throughout NW Wisconsin. Turn items in at your local hazardous waste collection site or contact a local metals recycling company. Keep lead out of the reach of children while you are awaiting proper disposal. Spread the word. Tell others about the problem and encourage them to switch to non-lead fishing tackle and ammunition. Lead is a toxic metal yet tons, yes TONS, of lead is deposited in Wisconsin's environment annually through hunting, fishing, and recreational shooting, according to the Wisconsin Bird Conservation Initiative (WBCI). Lead deposited in the environment will persist indefinitely and will not break down over time into less-toxic compounds. WBCI goes on to state that, mortality due to lead poisoning has been documented in a wide variety of birds. Lead toxicity can have sub-lethal consequences that can compromise avian survival and reproductive success. Thank you to Loonwatch for donating "Get the Lead Out" educational "rack cards" for distribution at the HHW events.

### Safe Med Disposal

I am sure you have heard that medications need to be safely disposed of for a number of reasons; not only to prevent pollution of our lakes and rivers but also to keep drugs out of the hands of those that shouldn't have them like children and addicts. The Superior Police Department and the Douglas County Sheriff's Office have a permanent drop box for unused, expired and unwanted medications. It is located at 1316 N. 14th Street Suite 150 (in the City Government Center) The office is open from 8 am to 4:30 p.m. Monday through Friday.

Although it is completely confidential you can cover your name but leave the name of the medication on the bottle. Syringes, liquids and thermometers cannot be accepted.

This is what the meds drop-box looks like.

## Energy & Resources

Neglecting to recover and reuse products and packaging means energy and other natural resources are wasted in the extraction and production of virgin materials and the manufacture of new products. According to the U.S. Environmental Protection Agency (EPA), the extraction, production, transport, and disposal of goods accounts for approximately 29 percent of all man-made greenhouse gas emissions. Greater reuse and recycling of consumer products and packaging is a powerful greenhouse gas reduction strategy.
