The Douglas County Forest, Parks and Recreation Committee will receive sealed bids for the purchase of the designated stumpage on the enclosed tracts until **5:30 p.m. Tuesday, June 9, 2020** at the Douglas County Forestry Department, 9182 East Hughes Avenue, P.O. Box 211, Solon Springs, WI 54873. Bids will be opened and read at **6:00 p.m. Tuesday, June 9, 2020** at the Forestry Department Headquarters, 9182 East Hughes Avenue, Solon Springs, WI 54873.

Douglas County will award Contracts to the acceptable highest bidder pending verification and approval of each winning bid. In the event of tie bids, the successful bidder will be determined by the toss of a coin by the acting Chairperson of the Douglas County Forest, Parks, and Recreation Committee. No late bids will be considered. No bid will be considered from bidders who are in non-compliance with any current timber sale Contract with Douglas County, are delinquent in their financial obligations to Douglas County, are involved with a pending timber theft or trespass with the County, or from a bidder whose bidding privileges have been either temporarily or indefinitely revoked by the County.

Douglas County reserves the right to reject any or all bids, to waive technicalities, and to accept bids most advantageous to the County. For further information, bid forms, maps, or a sample Contract; please contact the Douglas County Forestry Department at (715) 378-2219.

**NOTICES:**

**I. BIDDING:** It is the responsibility of the bidder to inspect; evaluate the stumpage, examine the locations, investigate field conditions, and check Contract requirements for each tract prior to bidding. Bidders are encouraged to contact the “Prepared By” individual on the enclosed tracts for detailed information regarding each tract (see Section XX for contact information). Submission of bid reflects that the bidder has inspected the tract and clearly understands and agrees to all Contract conditions and requirements herein.

Bids for individual tracts must each be submitted on a standard “Douglas County Forestry Department Bid for Advertised Timber” form, indicating correct tract number, and be presented in a sealed envelope clearly marked “Sealed Timber Bid Tract (include tract number)”. An online version of the bid form reducing the chances for errors is also available at [www.douglascountywi.org/forestry](http://www.douglascountywi.org/forestry). Forms must be completed legibly and correctly in their entirety with all requested information required for bid consideration.

Bids must be submitted separately for each tract by indicating the advertised species, the advertised species product volume, a per product bid price for each species advertised, a total bid value for each species and product advertised, and a total tract bid value for all species and products advertised using the corresponding locations on the bid form.

Considered bids must meet or exceed the minimum total advertised tract value, including the minimum advertised total tract value for each species and product listed.

Bids below the minimum advertised total tract value for each species and product listed, the minimum total advertised tract value; or incomplete, illegible, or incorrect bids will not be considered.

The use of an off-highway-vehicle (ATV or snowmobile) on routes or areas closed to motorized use must be approved by the Douglas County Forestry Department prior to occurrence or the operator is subject to penalty as provided by County Ordinance. If granted, permission will be authorized for pre-bidding inspection purposes only and operators shall operate in a safe, responsible, and environmentally friendly fashion. Contact the Department at (715) 378-2219 for further information.

**II. BID GUARANTEE BOND:** A bid guarantee for a minimum of 10-percent of the total tract bid value must accompany each bid for an individual tract as a bid guarantee bond, payable to Douglas County Forestry Department.

The bid guarantee bond must be in the form of cash, cashier's check, certified check, money order, bank draft, personal check, or business check unless otherwise specified by the County; must be covered by sufficient funds in the account on which it is drawn once submitted to the County, and remain in effect until the Contract is executed by all parties. The County reserves the
right to investigate sufficient funds coverage on any bid guarantee bond provided. In the event that the bid guarantee bond is not covered by sufficient funds, the bidder will be forbid from being awarded the Contract.

The bid guarantee bond will be held by the County until replaced by the successful bidder's performance bond. Bid guarantee bonds will be returned to unsuccessful bidders.

Failure by the successful bidder to provide the County with the mandatory executed Contract of sale, performance bond, current certificates of insurance, and current SFI training certificate equivalent to those conditions provided below within 30 calendar days immediately following the auction date will result in forfeiture of the bid guarantee bond in its entirety to the County and forbid the bidder from being awarded the Contract.

III. PERFORMANCE BOND: Within 30 calendar days immediately following the auction date or before commencement of any Contract operations, whichever occurs first, the successful bidder shall provide and the County shall receive a performance bond in the amount of 20-percent of the total purchased tract value. Such a performance bond shall be submitted to the County for approval in the form of cash bond, written performance bond (surety bonds will not be accepted), or irrevocable letter of credit. The County reserves the right to limit the form of acceptable performance bond. The Purchaser must indicate on the bid form what form of performance bond will be provided to the County.

In the event that a cash performance bond is indicated on the bid form, the bid guarantee bond will be deposited immediately and applied towards the performance bond. The balance of the cash performance bond is to be provided by the successful bidder pursuant to those conditions provided above.

In the event that a written performance bond or irrevocable letter of credit is indicated on the bid form, the successful bidder will provide the County a written performance bond (surety bonds will not be accepted) or irrevocable letter of credit issued by a bank or insurance company which is a member of the Federal Reserve System or insured by the Federal Deposit Insurance Corporation pursuant to those conditions provided above. The written performance bond or irrevocable letter of credit shall have an expiration date of no less than 30 calendar days past the sale expiration date.

Failure by the successful bidder to provide the County with the mandatory amount and form of performance bond equivalent to those conditions provided above within 30 calendar days immediately following the auction date will result in forfeiture of the bid guarantee bond in its entirety to the County and forbid the bidder from being awarded the Contract.

IV. LIABILITY INSURANCE: Within 30 calendar days immediately following the auction date or before commencement of any Contract operations, whichever occurs first, the successful bidder shall provide and the County shall receive a current certificate of comprehensive general liability insurance from the insurer(s) of the successful bidder or their agents certifying coverage to the limit of $1,000,000 per occurrence and $1,000,000.00 per aggregate for property damage and bodily injury, including death. Such certificate shall name the County as an additional insured and shall be submitted to the County for approval of the insurer(s), the amount, and the form. The County reserves the right to require a certified copy of any such certificate or to investigate and/or examine the policy itself.

Failure by the successful bidder to provide the County with the mandatory certificate of insurance equivalent to those conditions provided above within 30 calendar days immediately following the auction date will result in forfeiture of the bid guarantee bond in its entirety to the County and forbid the bidder from being awarded the Contract.

V. WORKERS' COMPENSATION INSURANCE: Within 30 calendar days immediately following the auction date or before commencement of any Contract operations, whichever occurs first, the successful bidder shall provide and the County shall receive a current certificate of insurance verifying workers' compensation coverage or proof of exemption from such coverage as provided by law. Such written certificate or verification shall be submitted to the County for approval. The County reserves the right to require a certified copy of any such certificate or written verification or to investigate and/or examine the policy itself.

Failure by the successful bidder to provide the County with the mandatory certificate of insurance for workers' compensation coverage or exemption from such coverage as indicated above within 30 calendar days immediately following the auction date will result in forfeiture of the bid guarantee bond in its entirety to the County and forbid the bidder from being awarded the Contract.

VI. SFI TRAINING STANDARD: Within 30 calendar days immediately following the auction date or before commencement of any Contract operations, whichever occurs first, the successful bidder shall provide and the County shall
receive a valid certificate of completion for the current Wisconsin Sustainable Forestry Initiative (SFI) training standards or comparable certification training standards of different States (depending on the successful bidder’s address of its principle place of business) as approved by the Forest Industry Safety & Training Alliance (FISTA) which can be contacted at 1-800-551-2656. Such certificate shall be in the name of the individual responsible for signing the Contract on behalf of the successful bidder, or the president, principle officer, agent, owner, co-owner, or member of the firm of the successful bidder; and shall be submitted to the County for approval. The County reserves the right to require a certified copy of any such certificate or to investigate and/or examine training records itself.

Failure by the successful bidder to provide the County with the mandatory certificate of completion for the current SFI training standards as indicated above within 30 calendar days immediately following the auction date will result in forfeiture of the bid guarantee bond in its entirety to the County and forbid the bidder from being awarded the Contract.

VII. CONTRACT EXECUTION: Within 30 calendar days immediately following the auction date or before commencement of any Contract operations, whichever occurs first, the successful bidder shall provide and the County shall receive the original Contract with all required information completed with the original signature of a president, principle officer, agent, owner, co-owner, or member of the firm of the successful bidder.

Failure by the successful bidder to provide the County with the Contract as indicated above or with an incomplete, illegible, or incorrect Contract within 30 calendar days immediately following the auction date will result in forfeiture of the bid guarantee bond in its entirety to the County and forbid the bidder from being awarded the Contract.

VIII. PAYMENT SCHEDULE: Payment of the initial advance stumpage payment or lump sum payment, is required prior to the commencement of any Contract operations other than road and landing construction activities. Removal of any products prior to receipt of the initial advance stumpage payment or lump sum payment by the County will be treated as harvested without the County’s consent or permission and subjects the Purchaser to civil and/or criminal penalties provided under Douglas County Ordinance #7.6.

The second and subsequent increment installment payments will be due to the County at the point the value of all products removed from the sale reaches 75-percent of the credit on deposit. In no event will payments due be made by the Purchaser to the County more than 15 calendar days from the date of Invoice. The County reserves the right to place additional payment requirements on the Purchaser to protect its best interests or those best interests of the public.

The following plan is used by the County to determine the increment schedule required on the enclosed tracts, unless otherwise specified by the County:

<table>
<thead>
<tr>
<th>Total Contract Purchase Value</th>
<th>Increment Schedule</th>
</tr>
</thead>
<tbody>
<tr>
<td>Lump Sum</td>
<td>100% Payment or Per Harvest Unit (See Tract Specs)</td>
</tr>
<tr>
<td>UP to $5,000.00</td>
<td>100% Payment</td>
</tr>
<tr>
<td>$5,000.01 to $10,000.00</td>
<td>50% Payment</td>
</tr>
<tr>
<td>$10,000.01 to $150,000.00</td>
<td>10% Payment</td>
</tr>
<tr>
<td>$150,000.01 and OVER</td>
<td>5%(2),10%(9) Payment</td>
</tr>
</tbody>
</table>

IX. PRODUCT STANDARDS: Standard advertised products are as follows:
- 4" Roundwood Product - A tree, log or stick with a minimum of one 100-inch stick to a 4-inch top diameter.
- Whole-tree Product - All or any woody material from the sheared butt stump of all 2-inch and greater DBH trees to the tip of the tree, including all logs, sticks and branches originating from any stem associated with the tree.
- Softwood Sawlog Product - A tree, log or stick 9-inches or larger top DIB on the small end of a 100-inch length containing Scribner Decimal “C” net scale greater than or equal to 50% of gross scale for the log.
- Hardwood Sawlog Product - A tree, log or stick 10-inches or larger top DIB on the small end of a 100-inch length containing Scribner Decimal “C” net scale greater than or equal to 50% of gross scale for the log.

X. VOLUME AND WEIGHT STANDARDS: The enclosed volumes/weights of products by tract are estimates. The County provides no warranty or guarantee as to the species, product type, quality, quantity, or condition. The bidder is responsible for making these determinations and bidders should inspect and evaluate the timber contained in the enclosed tracts prior to bidding. Standard advertised volume/weight measures are as follows:
- A standard cord is a volume of stacked or piled wood products, including bark and air space, occupying 128 cubic feet.
XI. ACCESS: The Purchaser is required to complete all road construction requirements for the enclosed tracts. Location of all road, transportation, and access routes, including associated infrastructure components, for the enclosed tracts are designated by the County and are limited to what is displayed on the maps and in the Contract conditions. The County does not conduct road appraisals. All road and infrastructure construction cost estimates and actual expenses are the responsibility of the Purchaser and bidders should inspect and evaluate these based on Contract requirements and field conditions prior to bidding.

XII. EXTENSIONS: It is expressly understood by the bidder that Contract extensions are not guaranteed and full performance on a Contract is expected prior to the initial expiration date.

XIII. COMMENCEMENT OF OPERATIONS: Operations may not commence on any tract before all Contract execution, insurance, SFI training, financial, and additional required conditions have been successfully met by the Purchaser and approved by the County.

XIV. RECEIPT OF REQUIREMENTS: The bidder and/or successful bidder bears all responsibility for postal or delivery delays outside of the County’s control for all requirements to be received by the County prior to bid consideration and/or Contract execution, including but not limited to; the bid, the bid guarantee bond, the performance bond, liability insurance, workers’ compensation insurance, SFI training standard, the Contract, payments, and all other correspondence, documents, and requirements.

XV. DIRECT SALES: Periodically Douglas County will offer direct stumpage sales. Direct sales are available on a first come, first served basis with the sale offered at or above the total appraised value with no percentage reductions, according to the WDNR Timber Sale Handbook. Please contact the Douglas County Forestry Department at (715) 378-2219 for direct sale availability and/or additional information.

XVI. IRRESPONSIBLE BIDDER: A bidder deemed by the County to be an irresponsible bidder may be refused the opportunity to bid upon or obtain Douglas County timber sales for a pre-determined set time period as determined by the County or indefinitely as deemed in the best interest of the County.

XVII. FOREST CERTIFICATION: The Douglas County Forest, including the areas encompassed by the enclosed tracts, is certified to the standards of the Forest Stewardship Council ® (FSC ® C006090) FSC 100% and the Sustainable Forestry Initiative ® SFI-01617 SFI 100%. Forest products harvested from the Douglas County Forest may be delivered to the destination facility as certified as long as the Contractor hauling the forest products is chain-of-custody (COC) certified or covered under a COC certificate from the destination facility. The Purchaser assumes all responsibility for maintaining COC after leaving the area encompassed by any individual tract.

XVIII. EAB QUARANTINE: As of March 30, 2018, all of Wisconsin has been placed under a Wisconsin Department of Agriculture, Trade, and Consumer Protection (DATCP) and United States Department of Agriculture (USDA) quarantine for Emerald Ash Borer (EAB). Quarantine compliance, including rules and regulations regarding the transport and utilization of ash products, is the full responsibility of the Purchaser. For additional information on the quarantine, including compliance agreements, please contact DATCP at 608-224-4573 and/or the USDA-APHIS at 608-231-9553.

XIX. TRUCK HAULING INFORMATION: The number of Douglas County townships that have developed or are in the process of developing additional policies in the form of regulations to protect their investments in and limit damage caused by heavy equipment to their local township roads continues to increase. The Douglas County Forestry Department has taken an active role in working with these townships in an attempt to alleviate concerns. The Department believes that their intent is not to restrict harvesting and subsequent hauling of timber, but a response to repetitive and inappropriate use by heavy trucks and equipment. Hauling Contractors need to be aware that public relations are vital to their business and inconsiderate and inappropriate actions reflect poorly on all of us in the forest industry.

All required permits and conditions for use of any public roadways other than those managed by the Douglas County Forestry Department are the responsibility of the Purchaser to obtain, keep current, and comply with. The County bears no responsibility or assures guaranteed use of any public roadway outside of its scope of authority used for the purpose of accessing any of the enclosed tracts and any additional requirements, restrictions, conditions, or terms enacted by any roadway authority are the
responsibility of the Purchaser. The County recommends contacting the appropriate roadway authority prior to bidding on any of the enclosed tracts.

Below are the town chair contact information for each township and one village that contain Douglas County forest and special use land within their boundaries. Contacts for the Douglas County Highway Department and the Forestry Department are also included. Bidders should refer to this information as they prepare bids for the enclosed tracts. This information is up-to-date and current at the time of printing only, please contact the town/village, Sale Administrator, or see the “Official E-Directory” link on the Douglas County website [www.douglascountywi.org](http://www.douglascountywi.org) for updates and/or additional information.

Total Tract Bid Value

Enclosed is a Bid Guarantee Bond drawn payable to Douglas County Forestry Department to accompany this bid as required, in the amount of:

Bid Guarantee Bond Amount

10% of the Total Tract Bid Value

In the form of:  □ Cash  □ Business/Personal Check  □ Cashier’s/Certified Check  □ Money Order

If declared the successful bidder for this tract, I agree to execute a Contract of sale, furnish a satisfactory performance bond amounting to 20-percent of the total tract bid value, provide proof of applicable insurances, and provide a current Wisconsin SFI training certificate within a maximum of 30 calendar days immediately following the auction date or prior to the commencement of any operations.

If declared the successful bidder for this tract, indicate whether you will be providing a cash performance bond, an irrevocable letter of credit, or a written performance bond (surety bonds will not be accepted).

□ Cash Performance Bond  □ Irrevocable Letter of Credit or Written Performance Bond

Bids will be awarded based on the total tract bid value, providing all individual bids meet or exceed the minimum total advertised tract value, including the minimum advertised total tract value for each species and product listed; in addition to all other requirements being met. Douglas County reserves the right to reject any or all bids, to waive technicalities, and to accept bids most advantageous to the County.

Indicate whether this bid is being submitted on behalf of a:  □ Corporation  □ Partnership  □ Sole Proprietorship (individual)

Representative (Print Name)  Title  Organization Name

Organization (or Representative) Street Address  City  State  Zip  Contact Phone Number

Email Address  Representative (Signature)  Date
Instructions on how to complete the Bid Form

(1) Enter the individual tract number at the top right of the Form.

(2) Enter the tract's advertised species, product volumes, and bid amounts in the table as follows:

(a) For Ticket Scale Tracts:

- Column A - List advertised species for the tract in same order as listed on Timber Sale Map.
- Column B - If bidding on advertised 4" Roundwood Cords, list Estimated Volume in 4" Roundwood Cords from the Timber Sale Map per Species.
- Column C - If bidding on advertised 4" Roundwood Cords, enter your Bid Price Per 4" Roundwood Cord per Species.
- Column D - If bidding on advertised Whole-tree Cords, list Estimated Volume in Whole-tree Cords from the Timber Sale Map per Species.
- Column E - If bidding on advertised Whole-tree Cords, enter your Bid Price Per Whole-tree Cord per Species.
- Column F - If bidding on advertised Sawlogs, list Estimated Volume in Sawlog MEF from the Timber Sale Map per Species.
- Column G - If bidding on advertised Sawlogs, enter your Bid Price Per Sawlog MBF per Species.
- Column H - Enter the Total Bid Value by Species & Product by multiplying the advertised bid product volume by the corresponding product bid price.
- Total all species and product amounts in column H and enter the Total Tract Bid Value at the bottom of the column.

(b) For Lump Sum Scale Tracts:

- Write the words "LUMP SUM" once in column A (under Species).
- Enter the single value of your total lump sum bid for the tract under the Total Tract Bid Value at the bottom of column H.

* For lump sum scale tracts, values for individual bid price per product and species and total bid value by species and product DO NOT have to be entered. However, you can enter these figures to assist you in calculating your total lump sum bid for all advertised species and products if desired.

(3) Enter the Bid Guarantee Bond amount (10% of the Total Tract Bid Value) and mark the appropriate form of bond that will accompany your bid for the tract.

(4) Mark the type of Performance Bond that you will provide if declared the successful bidder for the tract.

(5) Mark the type of organization or entity that you are bidding on behalf of.

(6) At the bottom of the Form, print your name, your title, the organization's name you are bidding on behalf of, your affiliated organization's or your address, your contact phone number (please include multiple numbers if appropriate), and email address.

(7) Sign and date the Form with an original signature and date. All forms must be signed and dated to be considered.

(8) Enclose the Form along with your Bid Guarantee Bond in a sealed envelope clearly marked "Sealed Timber Bid Tract (include tract number)" and deliver to the Douglas County Forestry Department by the date and time of the deadline. Individual separate envelopes must be used for each tract.

---

The Bid Form MUST BE completed in its entirety---

Bids below the minimum advertised total tract value for each species and product listed, below the minimum total advertised tract value; or incomplete, illegible, or incorrect bids will not be considered.

- Column F - If bidding on advertised Sawlogs, list Estimated Volume in Sawlog MBF from the Timber Sale Map per Species.
- Column G - If bidding on advertised Sawlogs, enter your Bid Price Per Sawlog MBF per Species.
- Column H - Enter the Total Bid Value by Species & Product by multiplying the advertised bid product volume by the corresponding product bid price.
- Total all species and product amounts in column H and enter the Total Tract Bid Value at the bottom of the column.

(b) For Lump Sum Scale Tracts:

- Write the words “LUMP SUM” once in column A (under Species).
- Enter the single value of your total lump sum bid for the tract under the Total Tract Bid Value at the bottom of column H.

* For lump sum scale tracts, values for individual bid price per product and species and total bid value by species and product DO NOT have to be entered. However, you can enter these figures to assist you in calculating your total lump sum bid for all advertised species and products if desired.

(3) Enter the Bid Guarantee Bond amount (10% of the Total Tract Bid Value) and mark the appropriate form of bond that will accompany your bid for the tract.

(4) Mark the type of Performance Bond that you will provide if declared the successful bidder for the tract.

(5) Mark the type of organization or entity that you are bidding on behalf of.

(6) At the bottom of the Form, print your name, your title, the organization’s name you are bidding on behalf of, your affiliated organization’s or your address, your contact phone number (please include multiple numbers if appropriate), and email address.

(7) Sign and date the Form with an original signature and date. All forms must be signed and dated to be considered.

(8) Enclose the Form along with your Bid Guarantee Bond in a sealed envelope clearly marked “Sealed Timber Bid Tract (include tract number)” and deliver to the Douglas County Forestry Department by the date and time of the deadline. Individual separate envelopes must be used for each tract.

---

*The Bid Form MUST BE completed in its entirety*

Bids below the minimum advertised total tract value for each species and product listed, below the minimum total advertised tract value; or incomplete, illegible, or incorrect bids will not be considered.
DOUGLAS COUNTY FORESTRY DEPARTMENT
BID FOR ADVERTISED TIMBER

Douglas County Forestry Department
9182 East Hughes Avenue
P.O. Box 211
Solon Springs, WI 54873
Phone (715) 378-2219

TRACT NUMBER:
(Enter the Tract Number)

TO DOUGLAS COUNTY FOREST, PARKS, AND RECREATION COMMITTEE:

Submitted in response to the notice of Timber Stumpage for Sale published in the Daily Telegram on May 26, 29, & June 2, 2020, I hereby submit the following bid for the advertised timber stumpage to be cut and sold from Douglas County lands described as follows:

See reverse side for instructions on how to complete

Total Tract Bid Value

Enclosed is a Bid Guarantee Bond drawn payable to Douglas County Forestry Department to accompany this bid as required, in the amount of:

Bid Guarantee Bond Amount
10% of the Total Tract Bid Value

In the form of:  [ ] Cash  [ ] Business/Personal Check  [ ] Cashier’s/Certified Check  [ ] Money Order

If declared the successful bidder for this tract, I agree to execute a Contract of sale, furnish a satisfactory performance bond amounting to 20-percent of the total tract bid value, provide proof of applicable insurances, and provide a current Wisconsin SFI training certificate within a maximum of 30 calendar days immediately following the auction date or prior to the commencement of any operations.

If declared the successful bidder for this tract, indicate whether you will be providing a cash performance bond, an irrevocable letter of credit, or a written performance bond (surety bonds will not be accepted).

[ ] Cash Performance Bond  [ ] Irrevocable Letter of Credit or Written Performance Bond

Bids will be awarded based on the total tract bid value, providing all individual bids meet or exceed the minimum advertised total tract value, including the minimum advertised total tract value for each species and product listed; in addition to all other requirements being met. Douglas County reserves the right to reject any or all bids, to waive technicalities, and to accept bids most advantageous to the County.

Indicate whether this bid is being submitted on behalf of a:  [ ] Corporation  [ ] Partnership  [ ] Sole Proprietorship (individual)

Representative (Print Name)  Title  Organization Name

Organization (or Representative) Street Address  City  State  Zip  Contact Phone Number

Email Address  Representative (Signature)  Date
Instructions on how to complete the Bid Form

(1) Enter the individual tract number at the top right of the Form.

(2) Enter the tract’s advertised species, product volumes, and bid amounts in the table as follows:

   (a) For Ticket Scale Tracts:

   > Column A - List advertised species for the tract in same order as listed on Timber Sale Map.
   > Column B - If bidding on advertised 4” Roundwood Cords, list Estimated Volume in 4” Roundwood Cords from the Timber Sale Map per Species.
   > Column C - If bidding on advertised 4” Roundwood Cords, enter your Bid Price Per 4” Roundwood Cord per Species.
   > Column D - If bidding on advertised Whole-tree Cords, list Estimated Volume in Whole-tree Cords from the Timber Sale Map per Species.
   > Column E - If bidding on advertised Whole-tree Cords, enter your Bid Price Per Whole-tree Cord per Species.
   > Column F - If bidding on advertised Sawlogs, list Estimated Volume in Sawlog MBF from the Timber Sale Map per Species.
   > Column G - If bidding on advertised Sawlogs, enter your Bid Price Per Sawlog MBF per Species.
   > Column H - Enter the Total Bid Value by Species & Product by multiplying the advertised bid product volume by the corresponding product bid price.
   > Total all species and product amounts in column H and enter the Total Tract Bid Value at the bottom of the column.

   (b) For Lump Sum Scale Tracts:

   > Write the words “LUMP SUM” once in column A (under Species).
   > Enter the single value of your total lump sum bid for the tract under the Total Tract Bid Value at the bottom of column H.

   * For lump sum scale tracts, values for individual bid price per product and species and total bid value by species and product DO NOT have to be entered. However, you can enter these figures to assist you in calculating your total lump sum bid for all advertised species and products if desired.

(3) Enter the Bid Guarantee Bond amount (10% of the Total Tract Bid Value) and mark the appropriate form of bond that will accompany your bid for the tract.

(4) Mark the type of Performance Bond that you will provide if declared the successful bidder for the tract.

(5) Mark the type of organization or entity that you are bidding on behalf of.

(6) At the bottom of the Form, print your name, your title, the organization’s name you are bidding on behalf of, your affiliated organization’s or your address, your contact phone number (please include multiple numbers if appropriate), and email address.

(7) Sign and date the Form with an original signature and date. All forms must be signed and dated to be considered.

(8) Enclose the Form along with your Bid Guarantee Bond in a sealed envelope clearly marked “Sealed Timber Bid Tract (include tract number)” and deliver to the Douglas County Forestry Department by the date and time of the deadline. Individual separate envelopes must be used for each tract.

---

The Bid Form MUST BE completed in its entirety---

Bids below the minimum advertised total tract value for each species and product listed, below the minimum total advertised tract value; or incomplete, illegible, or incorrect bids will not be considered.
This map shows approximate locations of tracts offered for the June 9, 2020 Timber Auction. For more precise tract information, refer to the individual tract maps in the prospectus. This map is for reference only.

TOTALS 3,200 (5,390) XXX $88,438.00

The Aspen volume contains approximately 68% Aspen, 21% Red Maple, 7% Balsam Fir, 2% Ash, 1% Sugar Maple and 1% Misc. The Red Pine cord volume contains approximately 47% sawlog material and pole quality products with a 10.6 inch average DBH.
TRACT 18-20 (BAD HARE DAY) – SUPPLEMENTAL REQUIREMENTS
The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
- Harvest unit 1 has a clear-cut harvest prescription with an estimated average residual basal area of 412.
- Harvest unit 2 has a 3rd entry improvement thinning harvest prescription with an estimated average residual basal area of 10512.

B. SEASONAL RESTRICTIONS -
- All harvesting operations are not restricted by season or time of the year on an estimated 80% of the harvest area (uplands) and shall be limited to frozen ground conditions or unusually dry conditions only on an estimated 20% of the harvest area (lowlands). Contact the Sale Administrator for further information.

C. TREES DESIGNATED FOR CUTTING -
- In harvest unit 1, fell, skid and haul all aspen, red maple, sugar maple, ash, balsam fir, and miscellaneous species stems that meet the product and utilization standards as per product bid.
- In harvest unit 2, fell all marked stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
- In harvest unit 1, reserve and leave undamaged all yellow birch, red oak, elm, basswood, black spruce, white spruce, white pine, red pine, and white birch stems.
- In harvest unit 2, reserve and leave undamaged all non-marked red pine stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
- In harvest unit 1, "Slashing Maintenance" is required.
- In harvest unit 2, sheared stems shall be limbed and topped at the stump prior to product skidding or forwarding.
- Up to four landing locations shall be identified during the pre-operations meeting.
- Access road system may be utilized for product decked.
- The 11 existing wildlife openings within and/or adjacent to the sale area are designated as equipment restriction zones with no harvest buffer. This no harvest buffer shall be defined as an area extending 15-feet outside the opening boundary where no mechanized equipment shall operate and no harvesting shall occur. Contact the Sale Administrator for further information.

F. ACCESS AND ROADS -
- The total length of the access road system is approximately 8,000 feet. Approximately 7,500 feet of existing access road and 500 feet of new access road.
- Portions of the 7,500 feet of existing access road may require minimal "Class 3" reconstruction before use.
- The entire 500 feet of new access road will require "Class 3" new construction.
- A 500 foot portion of the existing access road shall be relocated and will require "Class 3" new construction.
- A portion of the existing access road will be abandoned and relocated as designated. The abandoned segments shall be blocked with "Earth Berms" and "Scattered Blockage Debris" as designated by the Sale Administrator.

G. OTHER -
- An invasive plant species (Buckthorn) has been identified within the harvest area. This area shall be harvested last and all equipment shall be cleaned prior to removal as directed by the Sale Administrator.

The Mixed HW volume contains approximately 50% Aspen, 20% Ash, 15% Red Maple, 9% Balsam Fir, and 6% Misc.
TRACT 20-20 (BACK 80) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Clear-cut harvest prescription with an estimated average residual basal area of 5ft².

B. SEASONAL RESTRICTIONS -
   ➢ In harvest unit 1, all harvesting operations are not restricted by season or time of the year on an estimated 70% of the harvest area (uplands) and shall be limited to frozen ground conditions only on an estimated 30% of the harvest area (lowlands). Contact the Sale Administrator for further information.
   ➢ In harvest unit 2, all harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ In harvest unit 1, fell, skid, and haul all aspen, ash, red maple, balsam fir, sugar maple, basswood, white spruce, black spruce, and miscellaneous species stems that meet the product and utilization standards as per product bid.
   ➢ In harvest unit 2, fell, skid, and haul all ash and miscellaneous species stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ In harvest unit 1, reserve and leave undamaged all yellow birch, white birch, red oak, white pine, and white cedar stems; and all advanced sub-merchantable balsam fir and spruce regeneration patches.
   ➢ In harvest unit 2, reserve and leave undamaged all white birch, red maple, balsam fir, and white cedar stems; and all advanced sub-merchantable balsam fir regeneration patches.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slashing Maintenance" is required for all harvest units excluding sub-merchantable balsam fir and spruce regeneration.
   ➢ One skid trail crossing shall be constructed as designated. This crossing may require installing temporary timber mats or corduroy. All equipment operation and skidding in this portion of the sale area shall be limited to this crossing. Contact the Sale Administrator for further information.
   ➢ The two existing wildlife openings within harvest unit 1 are designated as equipment restriction zones with a no harvest buffer marked in the field.
   ➢ Up to nine landing locations shall be identified during the pre-operations meeting.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 8,500 feet. Approximately 7,700 feet of existing access road and 800 feet of new access road.
   ➢ Portions of the existing access road will require minimal "Class 3" reconstruction before use and significant freeze down.
   ➢ The entire 800 feet of new access road will require "Class 3" new construction.
   ➢ Three "Freeze Down Crossings" shall be constructed as designated.
   ➢ The access road system utilizes a significant portion of a winter snowmobile trail. Recreational trail contract conditions shall apply.
   ➢ An "Earth Berm" is located on a portion of the harvest unit 1 access road and shall be reinstalled at the same designated location upon sale completion.

G. OTHER -
   ➢ An invasive plant species (Buckthorn) has been identified within harvest unit 2. This area shall be harvested last and all equipment shall be cleaned prior to removal as directed by the Sale Administrator.
   ➢ The skid trail crossing, three freeze down crossings, access roads, and landings all requiring new construction are not marked in the field. The Sale Administrator will locate, identify, and flag all these in during the pre-operations meeting.

The Mixed HW volume contains approximately 48% Red Maple, 23% Black Ash, 15% Sugar Maple, 6% Basswood, 5% White Birch, 2% Red Oak, & 1% White Ash. The Tamarack volume contains approximately 90% Tamarack & 10% Black Spruce.
TRACT 43-18 (SOUTH MOOSE HW) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   > Harvest unit 1 has a clear-cut harvest prescription with an estimated average residual basal area of 4ft².
   > Harvest unit 2 has an all-aged single tree selection thinning harvest prescription with an estimated average residual basal area of 73ft².

B. SEASONAL RESTRICTIONS -
   > No harvesting operations shall be permitted in either harvest unit from April 15th to July 15th (Oak Wilt).
   > Please note that lowland portions (approximately 20% of the harvest area) are very likely to be non-operable during non-frozen ground conditions.

C. TREES DESIGNATED FOR CUTTING -
   > In harvest unit 1, fell, skid, and haul all aspen, red maple, black ash, sugar maple, basswood, white birch, white ash, tamarack, and black spruce stems that meet the product and utilization standards as per product bid.
   > In harvest unit 2, fell all orange marked stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   > In harvest unit 1, reserve and leave undamaged all red oak, white spruce, and white pine stems.
   > In harvest unit 2, reserve and leave undamaged all non-marked stems.
   > In harvest unit 1 and 2, reserve and leave undamaged all advanced sub-merchantable red oak and hardwood regeneration.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   > "Slashing Maintenance" is required for harvest unit 1.
   > All harvesting operations shall be limited to short-wood/cut-to-length processing and forwarding operations only. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
   > Up to four landing locations shall be identified during the pre-operations meeting.

F. ACCESS AND ROADS -
   > The total length of the access road system is approximately 20,180 feet. Approximately 12,685 feet of existing access road and 7,475 feet of new access road.
   > Portions of the existing access road may require minimal "Class 2" reconstruction before use.
   > The entire 7,475 feet of new access road will require "Class 2" new construction.
   > Five permanent "Culvert Crossings" shall be constructed as designated. Please see contract attachment.
   > The access road crosses a winter snowmobile trail.
   > An "Earth Berm" shall be installed as designated.

TRACT 08-20 (MALLARD REMOVAL) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Overstory removal harvest prescription with an estimated average residual basal area of 4ft².

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ Fell, skid, and haul all sugar maple, white ash, black ash, basswood, red maple, and miscellaneous species stems; and all less than 22-inch DBH red oak stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ Reserve and leave undamaged all white birch, yellow birch, and white pine stems; and all 22-inch and greater DBH red oak stems.
   ➢ Reserve and leave undamaged advanced sub-merchantable regeneration.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ All harvesting operations shall be limited to cut-to-length operations only with a maximum product length of 18 feet. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
   ➢ Operations shall minimize to the greatest extent possible any damage to advanced regeneration.
   ➢ The sale administrator will layout a skid trail plan at the time of the pre-operations meeting. All equipment operation and skidding shall be limited to these trails and minimized on all other areas.
   ➢ Three landing locations are permitted as designated.
   ➢ Access road and recreational trail may be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ No new access roads shall be constructed.
   ➢ A portion of the access road is gated.
   ➢ The total length of the existing access road system is approximately 7,100 feet.
   ➢ Portions may require minimal "Class 3" reconstruction before use.
   ➢ Portions may require freeze down before use.
   ➢ An "Earth Berm" is located on a portion of the access road and shall be reinstalled at the same designated location upon sale completion. Berm removal is recommended during non-frozen ground conditions.
   ➢ The access road utilizes a significant portion of a winter snowmobile trail.

G. OTHER -
   ➢ Up to 4 designated winter snowmobile trail crossing points shall be identified during the pre-operations meeting. All hauling, skidding, and equipment operation from one side of the trail to the other shall be limited to these crossings. Leave all trail markers and signs undamaged. All slash must be pulled back at least 8 feet from the trail edge. Trail crossing must be maintained in safe condition at all times as directed by the Sale Administrator. Use extra care and caution when crossing the trail.

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Clear-cut with reserves harvest prescription with an estimated average residual basal area of 12ft2.

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ Fell all aspen, sugar maple, red maple, white birch, black ash, basswood, ironwood, cherry, scrub oak, and miscellaneous species stems; and all black spruce and tamarack stems that contain at a minimum, two 4" Roundwood Products. Skid and haul all felled stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ Reserve and leave undamaged all elm, yellow birch, white pine, red pine, white spruce, cedar, and balsam fir stems; and all black spruce and tamarack stems that contain at a minimum, one 4" Roundwood Product.
   ➢ Reserve and leave undamaged advanced sub-merchantable aspen and scrub oak regeneration.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ “Slashing Maintenance” is required, excluding desirable advanced sub-merchantable aspen and scrub oak regeneration.
   ➢ One skid trail crossing shall be constructed as designated. All equipment operation and skidding in this portion of the sale area shall be limited to this crossing.
   ➢ The access road bisects two wildlife openings. Please note that wildlife opening contract conditions shall apply. Contact the Sale Administrator for further information.
   ➢ Two landing locations are permitted as designated.
   ➢ Access road system shall be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 7,400 feet. Approximately 5,300 feet of existing access road and 2,100 feet of new access road.
   ➢ Portions of the 5,300 feet of existing access road may require minimal “Class 3” reconstruction before use.
   ➢ The entire 2,100 feet of new access road will require “Class 3” new construction.
   ➢ Portions of the entire 7,400 feet of access road will require freeze down before use.
   ➢ Two “Freeze Down Crossings” shall be constructed as designated.
   ➢ An “Earth Berm” is located on the eastern access road and shall be reinstalled at the same designated location.
   ➢ An “Earth Berm” shall be installed as designated on the western access road.

G. OTHER -
   ➢ The western portion of the sale area was heavily damaged by the July 1, 2011 windstorm. Not all portions of the sale area contain merchantable timber. Contact the Sale Administrator for further information.

TRACT 24-20 (35D) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   - Harvest unit 1 has a seed tree harvest prescription with an estimated average residual basal area of 12 ft².
   - Harvest unit 2 has a clear-cut with reserves harvest prescription with an estimated average residual basal area of 3 ft².

B. SEASONAL RESTRICTIONS -
   - All harvesting operations are not restricted by season or time of the year on an estimated 20% of the harvest area (uplands) and shall be limited to frozen ground conditions only on an estimated 80% of the harvest area (lowlands). Contact the Sale Administrator for further information.

C. TREES DESIGNATED FOR CUTTING -
   - Fell, skid, and haul all non-marked sugar maple, red maple, basswood, aspen, black ash, white birch, red oak, yellow birch, balsam fir, black spruce, tamarack, and miscellaneous species stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   - Reserve and leave undamaged all white pine, cedar, and green marked stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   - "Complete Vegetation Maintenance" is required for harvest unit 1.
   - "Slashing Maintenance" is required for harvest unit 2.
   - Some portions of the harvest units shall only be accessed by skid trails as designated. The sale administrator will layout a skid trail plan at the time of the pre-operations meeting.
   - One mainline skid trail shall be constructed east of Highway 35 as designated. All equipment operation and skidding in this portion of the sale area shall be limited to this trail.
   - Three skid trail crossings shall be constructed as designated. All equipment operation and skidding in these portions of the sale area shall be limited to these crossings. The southern skid trail crossing west of Highway 35 accessing harvest unit 1 is a skid trail "Freeze Down Crossing".
   - Four landing locations are permitted as designated.

F. ACCESS AND ROADS -
   - The access road east of Highway 35 is gated.
   - The total length of the access road system is approximately 3,400 feet. Approximately 1,650 feet of existing access road and 1,750 feet of new access road.
   - Portions of the existing access road will require minimal "Class 3" reconstruction before use.
   - The entire 1,750 feet of new access road will require "Class 3" new construction.
   - One "Freeze Down Crossing" shall be constructed as designated.
   - An "Earth Berm" shall be installed at a location designated by the Sale Administrator.
   - Access across land under other ownership has been secured by the County.

G. OTHER -
   - Note skidding distances.
   - A transmission line and associated right-of-way is located directly adjacent to Highway 35. Use extra care and caution when working in this area.
   - A Highway 35 temporary driveway permit has been secured from the Wisconsin DOT. A temporary culvert with endwalls and gravel approach shall be installed and removed as directed by the Sale Administrator. All conditions of the permit shall be met. Contact the Sale Administrator for further information.

TRACT 06-19 (HORSESHOE) – SUPPLEMENTAL REQUIREMENTS
The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Clear-cut harvest prescription with an estimated average residual basal area of 12ft².

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ Fell, skid, and haul all aspen, red maple, ash, white birch, basswood, balsam fir, sugar maple, tamarack, black spruce, and miscellaneous species stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ Reserve and leave undamaged all red oak, white pine, white spruce, red pine, elm, cherry, and yellow birch stems; and all advanced sub-merchantable hardwood and balsam fir regeneration.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slash Maintenance" is required for all stems excluding sub-merchantable balsam fir and hardwood regeneration.
   ➢ Two landing locations are permitted as designated.
   ➢ Access road system may be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 14,500 feet. Approximately 7,850 feet of existing "Class 2" access road and 6,650 feet of new access road.
   ➢ Portions of the existing access road may require "Class 2" reconstruction before use.
   ➢ The entire 6,650 feet of new access road will require "Class 3" new construction. Portions will require freeze down before use.
   ➢ Two "Freeze Down Crossings" shall be constructed as designated.
   ➢ An "Earth Berm" shall be installed as designated.

G. OTHER -
   ➢ Note skidding distances.
   ➢ Steep terrain exists in the northwest portion of the sale area.
   ➢ Protection of survey monument will be discussed during the pre-operations meeting.

The Mixed HW volume contains approximately 47% White Birch, 35% Aspen, 9% Black Ash, 5% Sugar Maple, 3% Red Maple, and 1% Misc. The Tamarack volume contains approximately 61% Tamarack, 21% Black Spruce, and 18% Balsam Fir.
TRACT 35-19 (CHAGA TEE) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
- Harvest unit 1 has a seed tree harvest prescription with an estimated average residual basal area of 9ft².
- Harvest unit 2 has a clear-cut with reserves harvest prescription with an estimated average residual basal area of 20ft².
- Harvest unit 3 has a clear-cut harvest prescription with an estimated average residual basal area of 1ft².
- Harvest unit 4 has a 3rd entry improvement thinning harvest prescription with an estimated average residual basal area of 118ft².

B. SEASONAL RESTRICTIONS -
- All harvesting operations are not restricted by season or time of the year on an estimated 50% of the harvest area (uplands) and shall be limited to frozen ground conditions or unusually dry conditions only on an estimated 50% of the harvest area (lowlands). Contact the Sale Administrator for further information.

C. TREES DESIGNATED FOR CUTTING -
- In harvest unit 1, fell, skid, and haul all white birch, aspen, red maple, sugar maple, balsam fir, black ash, tamarack, black spruce, and miscellaneous species stems that meet the product and utilization standards as per product bid.
- In harvest unit 2, fell, skid, and haul all black ash species stems that meet the product and utilization standards as per product bid.
- In harvest unit 3, fell all aspen, red maple, sugar maple, and miscellaneous species stems; and all balsam fir stems that contain at a minimum, one 4" Roundwood Product. Skid and haul all felled stems that meet the product and utilization standards as per product bid.
- In harvest unit 4, fell all orange marked red pine stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
- In harvest unit 1, reserve and leave undamaged all yellow birch, red pine, red oak, and green marked stems.
- In harvest unit 2, reserve and leave undamaged all balsam fir, white birch, red maple, yellow birch, white pine, and tamarack stems.
- In harvest unit 3, reserve and leave undamaged all white pine and white birch stems; and all balsam fir stems that do not contain at a minimum, one 4" Roundwood Product.
- In harvest unit 4, reserve and leave undamaged all non-marked red pine stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
- "Slashing Maintenance" is required for all hardwood stems in harvest units 1, 2, and 3.
- In harvest unit 4, all harvesting operations shall be limited to short-wood/cut-to-length processing and forwarding operations only. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
- In harvest units 1 and 3 the sale administrator will layout a skid trail plan at the time of the pre-operations meeting. All equipment operation and skidding shall be limited to this layout.
- Up to five landing locations shall be identified during the pre-operations meeting.

F. ACCESS AND ROADS -
- No new access roads shall be constructed.
- Portions of the access road are gated.
- Portions of the access road is blocked with an "Earth Berm". Berm removal is recommended during non-frozen ground conditions.
- The total length of the existing access road system is approximately 14,470 feet. Portions may require minimal "Class 3" reconstruction before use.
- Two permanent "Culvert Crossings" shall be constructed. Please see contract attachment.
- One "Freeze Down Crossing" shall be constructed as designated.
- The access road utilizes a significant portion of a winter snowmobile trail.
- Two "Earth Berms" are located on the access road and shall be reinstalled at the same designated locations.
- Pikes Peak Road is a County Forest Road, winter snowmobile trail, and summer ATV/UTV trail. Noacking of products is permitted on or along this road.

G. OTHER -
- The Red Pine cord volume contains a percentage of bolt and sawlog size material. 13 inch average stem diameter.

The Mixed HW volume contains approximately 75% Red Maple, 12% Ash, 11% White Birch, & 2% Sugar Maple. The White Spruce volume contains approximately 75% White Spruce, 15% Black Spruce, 7% Tamarack, & 3% Balsam Fir.
TRACT 22-20 (MOOSE RIDGE ASPEN) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Clear-cut harvest prescription with an estimated average residual basal area of 412.

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ Fell, skid, and haul all aspen, red maple, ash, white birch, sugar maple, black spruce, tamarack, and balsam fir stems; and all less than 20-inch DBH white spruce stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ Reserve and leave undamaged all basswood, cherry, elm, and white pine stems; and all 20-inch and greater DBH white spruce stems.
   ➢ Reserve and leave undamaged advanced sub-merchantable regeneration patches.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ “Slashing Maintenance” is required excluding sub-merchantable desirable red maple, oak, and balsam fir regeneration.
   ➢ Spruce, tamarack, and balsam fir slash shall remain within the areas where these species were harvested.
   ➢ One skid trail “Freeze Down Crossing” shall be constructed as designated. This crossing may require installing temporary timber mats or corduroy. All equipment operation and skidding in this portion of the sale area shall be limited to this crossing. Contact the Sale Administrator for further information.
   ➢ Up to three landing locations shall be identified during the pre-operations meeting.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 8,000 feet. Approximately 4,400 feet of existing access road and 3,600 feet of new access road.
   ➢ Portions of the existing access road may require minimal “Class 3” reconstruction before use.
   ➢ The entire 3,600 feet of new access road will require “Class 3” new construction.
   ➢ One “Freeze Down Crossing” shall be constructed as designated.

TRACT 22-18 (Ericson Creek) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   - Harvest unit 1 has a clear-cut with reserves harvest prescription with an estimated average residual basal area of 14ft².
   - Harvest unit 2 has a clear-cut harvest prescription with an estimated average residual basal area of 15ft².

B. SEASONAL RESTRICTIONS -
   - All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   - In harvest unit 1, fell all aspen, white birch, red maple, black ash, black spruce, tamarack, white spruce, and balsam fir stems; and all 10-inch and greater DBH sugar maple stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid.
   - In Harvest unit 2, fell, skid, and haul all aspen, white birch, red maple, yellow birch, black ash, sugar maple, balsam fir, black spruce, and tamarack stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   - In harvest unit 1, reserve and leave undamaged all red oak, white pine, and white cedar stems; all less than 10-inch DBH sugar maple stems; and all advanced sub-merchantable white spruce regeneration.
   - In harvest unit 2, reserve and leave undamaged all green marked stems; all white cedar stems; and all advanced sub-merchantable black spruce regeneration.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   - “Slashing Maintenance” is required in harvest unit 1 excluding advanced sub-merchantable white spruce regeneration.
   - All harvesting operations shall be limited to short-wood/cut-to-length operations only. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
   - One skid trail “Freeze Down Crossing” shall be constructed as designated. All equipment operation and skidding in this portion of the sale area shall be limited to this crossing.
   - Slash and tops should be spread evenly across the harvest units and efficiently utilized to maximize equipment floatation and minimize soil displacement and compaction.
   - The use of freezedown and corduroy on mainline skid trails may be necessary to minimize soil disturbance and negative impacts to water quality.
   - Up to four landing locations shall be identified as designated or during the pre-operations meeting.
   - Access road system may be utilized for product decking.

F. ACCESS AND ROADS -
   - No vehicular access (in or out) to the east of Ericson Creek Road on Hunters Trail or from the designated berm location to the north on Ericson Creek Road shall be permitted.
   - The total length of the access road system is approximately 7,900 feet. Approximately 5,100 feet of existing access road and 2,800 feet of new access road.
   - The entire 5,100 feet of existing access will require “Class 3” reconstruction before use.
   - The entire 2,800 feet of new access road with require “Class 3” new construction.
   - One “Freeze Down Crossing” shall be constructed as designated.
   - An “Earth Berm” is located on one of the access roads as designated and shall be reinstalled at the same designated location.
   - Removal and reinstallation of motorized access road sign will be discussed during the pre-operations meeting.
   - Hunters Trail Road and Ericson Creek Road are County Forest Roads.
   - A portion of Hunters Trail Road is a winter snowmobile trail.

TOTALS 3,150 XXX XXX $39,690.00

The Mixed HW volume contains approximately 44% Red Maple, 31% Sugar Maple, 12% White Birch, 5% Basswood, 4% Ash, 2% Balsam Fir, 1% Aspen and 1% Misc.
TRACT 49-18 (A&A) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Harvest unit 1 has a clear-cut harvest prescription with an estimated average residual basal area of 6ft2.
   ➢ Harvest unit 2 has a shelterwood harvest prescription with an estimated average residual basal area of 40ft2.

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ In harvest unit 1, fell, skid, and haul all red maple, basswood, ash, sugar maple, aspen, white birch, balsam fir, and miscellaneous stems that meet the product and utilization standards as per product bid.
   ➢ In harvest unit 2, fell, skid, and haul all non-marked red maple, red oak, basswood, ash, sugar maple, aspen, white birch, balsam fir, and miscellaneous stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ In harvest unit 1, reserve and leave undamaged all red oak, spruce, cedar, and white pine stems.
   ➢ In harvest unit 2, reserve and leave undamaged all spruce, cedar, and white pine stems; and all green marked stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slashing Maintenance" is required for all harvest units.
   ➢ One skid trail "Freeze Down Crossing" shall be constructed as designated. All equipment operation and skidding in this portion of the sale area shall be limited to this crossing.
   ➢ Access road system may be utilized for product decking.
   ➢ Up to four landing locations are permitted as designated.

F. ACCESS AND ROADS -
   ➢ Access to all harvest units shall be from the east off Memorial County Forest Road.
   ➢ The total length of the access road system is approximately 19,100 feet. Approximately 11,400 feet of existing access road and 7,700 feet of new access road.
   ➢ Of the 11,400 feet of existing access road, 9,100 feet will require "Class 2" reconstruction and 2,300 feet will require "Class 3" reconstruction as designated.
   ➢ The entire 7,700 feet of new access road will require "Class 3" new construction. Portions may require freeze down before use.
   ➢ Two "Freeze Down Crossings" shall be constructed as designated. These crossings may require installing temporary timber mats. Contact the Sale Administrator for further information.
   ➢ Two "Earth Berms" shall be installed at locations designated by the Sale Administrator.
   ➢ Memorial Road is a County Forest Road.

G. OTHER -
   ➢ The access roads and landing locations requiring new construction are not marked in the field. The Sale Administrator will locate, identify, and flag these in during the pre-operations meeting.

TRACT 04-19 (MATLOCK MYSTERY) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Clear-cut harvest prescription with an estimated average residual basal area of 7 ft².

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ Fell, skid, and haul all aspen, tamarack, white birch, red maple, black ash, balsam fir, black spruce, and miscellaneous species stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ Reserve and leave undamaged all white spruce, red pine, and jack pine stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slashing Maintenance" is required.
   ➢ Two landing locations shall be identified during the pre-operations meeting.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 1,110 feet. Approximately 430 feet of existing access road and 630 feet of new access road.
   ➢ Portions of the existing access road may require minimal "Class 3" reconstruction before use.
   ➢ The entire 630 feet of new access road will require "Class 4" new construction with significant freeze down before use.
   ➢ Town road ditch shall be re-installed upon sale completion.
   ➢ One "Freeze Down Crossing" shall be constructed as designated. This crossing are not marked in the field and shall be identified during the pre-operations meeting.
   ➢ "Scattered Blockage Debris" is required as designated by the Sale Administrator.

G. OTHER -
   ➢ Note skidding distances.
   ➢ Access to the islands by way of access road or skid trail shall be discussed and determined during the pre-operations meeting.
   ➢ No access roads, skid trails, or landing locations are marked in the field. The Sale Administrator will locate, identify, and flag these in during the pre-operations meeting.

TRACT 13-20 (NOTHING LEFT) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Harvest unit 1 has a clear-cut with reserves harvest prescription with an estimated average residual basal area of 10ft².
   ➢ Harvest unit 2 has a clear-cut with reserves harvest prescription with an estimated average residual basal area of 12ft².

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations are not restricted by season or time of the year on an estimated 70% of the harvest area (uplands) and shall be limited to frozen ground conditions only on an estimated 30% of the harvest area (lowlands). Contact the Sale Administrator for further information.

C. TREES DESIGNATED FOR CUTTING -
   ➢ In both harvest units, fell, skid, and haul all aspen, white birch, red maple, ash, sugar maple, and miscellaneous species stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ In harvest unit 1, reserve and leave undamaged all red oak and balsam fir stems.
   ➢ In harvest unit 2, reserve and leave undamaged all red oak and balsam fir stems; and all advanced sub-merchantable regeneration.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ In harvest unit 1, “Slashing Maintenance” is required.
   ➢ All harvesting operations shall be limited to short-wood/cut-to-length operations only. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
   ➢ The access road to the northern patch of harvest unit 1 bisects a wildlife opening. Please note that wildlife opening contract conditions shall apply. Contact the Sale Administrator for further information.
   ➢ Two landing locations are permitted as designated. A third landing located along the Summit Trail town road shall be discussed during the preoperations meeting.

F. ACCESS AND ROADS -
   ➢ The total length of the existing access road system is approximately 14,250 feet.
   ➢ Portions of the existing access road for harvest unit 1, may require minimal “Class 3” reconstruction before use.
   ➢ Portions of the existing access road for harvest unit 2, may require minimal “Class 2” reconstruction before use.
   ➢ The harvest unit 2 access road is gated at the Summit Trail.
   ➢ Two skid trail “Freeze Down Crossings” shall be constructed as designated. All equipment operation and skidding in these portions of the sale area shall be limited to these crossings. These crossings are identified in the field with red paint.
   ➢ An “Earth Berm” is located on the harvest unit 1 access road and shall be reinstalled at the same designated location.

G. OTHER -
   ➢ Note skidding distances.

TRACT 26-20 (SPRUCETACULAR) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Clear-cut harvest prescription with an estimated average residual basal area of 2±2.

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ In harvest unit 1, fell, skid, and haul all aspen, white birch, red maple, balsam fir, and balsam poplar stems that meet the product and utilization standards as per product bid.
   ➢ In harvest unit 2, fell, skid, and haul all black spruce, tamarack, and balsam fir stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ In both harvest units, reserve and leave undamaged all white pine, white spruce, red oak, elm, cherry, and ironwood stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slashing Maintenance" is required for harvest unit 1.
   ➢ In both harvest units, all harvesting operations shall be limited to short-wood/cut-to-length operations only. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
   ➢ Three landing locations are permitted as designated. Alternative landing locations can be discussed during the pre-operations meeting.
   ➢ Access road system may be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 5,280 feet and will require "Class 4" new construction.
   ➢ Significant portions will require freeze down before use.

G. OTHER -
   ➢ 3-year term of contract.
   ➢ New road construction off County Highway A may require a driveway permit issued by the County Highway Department. Securing this permit shall be the responsibility of the County and may require installation of a culvert and gravel approach. Contact the Sale Administrator for further information.
   ➢ All access roads and landing locations requiring new construction are not marked in the field. The Sale Administrator will locate, identify, and flag these in during the pre-operations meeting.

The Aspen volume contains a small amount of Balsam Poplar.
TRACT 19-20 (THE GOLDEN WARD) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➤ Clear-cut harvest prescription with an estimated average residual basal area of 10ft2.

B. SEASONAL RESTRICTIONS -
   ➤ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➤ Fell, skid, and haul all aspen and balsam poplar stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➤ Reserve and leave undamaged all red pine, white pine, tamarack, white spruce, black ash, and white birch stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➤ “Slashing Maintenance” is required.
   ➤ Two skid trail “Freeze Down Crossings” shall be constructed as designated. All equipment operation and skidding in these portions of the sale area shall be limited to these crossings. Contact the Sale Administrator for further information.
   ➤ Three landing locations shall be identified during the pre-operations meeting.

F. ACCESS AND ROADS -
   ➤ No new access roads shall be constructed.
   ➤ The total length of the existing access road system is approximately 3,800 feet.
   ➤ The access road is gated.
   ➤ The access road utilizes a significant portion of a winter snowmobile trail.
   ➤ Portions may require freeze down before use.

G. OTHER -
   ➤ Direct access to State Highway 105 is not available and this sale should not be considered for harvesting and hauling during the spring road weight restriction period.
   ➤ A transmission line and associated right-of-way is located directly within the harvest area. Permission has been secured by the County to operate across this area. Area shall be maintained clear of all slash and harvest debris during active operations and upon sale completion as directed by the Sale Administrator.
   ➤ A snowmobile trail runs through and adjacent to a significant portion of the harvest unit and is designated as a equipment restriction zone. Equipment operation is limited to only hauling. One designated trail crossing point shall be identified north of Old State Highway 105 during the pre-operations meeting. All skidding and equipment operation from one side of the trail to the other shall be limited to this crossing. Leave all trail markers and signs undamaged. All slash must be pulled back at least 8 feet from the trail edge. Trail and crossing must be maintained in a safe condition at all times as directed by the Sale Administrator. Use extra care and caution when crossing the trail.
   ➤ A small portion of the harvest area boundary is designated with purple paint. Contact the Sale Administrator for further information.
   ➤ An Invasive plant species (Buckthorn) has been identified within the harvest area. This area shall be harvested last and all equipment shall be cleaned prior to removal as directed by the Sale Administrator.

TRACT 41-19 (BB PINE) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ 2nd entry improvement thinning harvest prescription with an estimated average residual basal area of 112 ft².

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations are not restricted by season or time of the year.

C. TREES DESIGNATED FOR CUTTING -
   ➢ Fell all jack pine, aspen, scrub oak, and orange marked stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ Reserve and leave undamaged all non-marked red pine stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ Sheared stems shall be limbed and topped at the stump prior to product skidding or forwarding.
   ➢ Two landing locations are permitted as designated.
   ➢ Access road system may also be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ No new access roads shall be constructed.
   ➢ The total length of the existing access road system is approximately 5,500 feet.
   ➢ Portions will require minimal "Class 3" reconstruction before use.
   ➢ The access road to the southern harvest unit utilizes a portion of a summer ATV and winter snowmobile trail. Note that recreational trail contract conditions shall apply.

G. OTHER -
   ➢ Underground utilities are located within the southern harvest unit directly adjacent to South Mail Road.
The Red Pine volume contains approximately 99% Red Pine and 1% Jack Pine. The Scrub Oak volume contains approximately 77% Scrub Oak and 23% Aspen. The red pine volume in harvest unit one contains a percentage of sawlog and pole material.
TRACT 42-19 (LOST LAKE) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   - Harvest unit 1 has a sanitation harvest prescription with an estimated average residual basal area of 70ft².
   - Harvest units 2 has a 1st entry improvement thinning harvest prescription with an estimated average residual basal area of 80ft².
   - Harvest units 3 has a 1st entry improvement thinning harvest prescription with an estimated average residual basal area of 60ft².
   - Harvest unit 4 has a clear-cut harvest prescription with an estimated average residual basal area of 8ft².

B. SEASONAL RESTRICTIONS -
   - All harvesting operations are not restricted by season or time of the year.

C. TREES DESIGNATED FOR CUTTING -
   - In harvest unit 1, fell, skid, and haul all jack pine, aspen, scrub oak, and all orange marked stems that meet the product and utilization standards as per product bid.
   - In harvest unit 2, in every third row, fell all red pine, jack pine, aspen, and scrub oak stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid. The Sale Administrator will describe the every third row harvest system and designate rows to be harvested during the pre-operations meeting.
   - In harvest unit 3, fell all aspen, scrub oak, and all orange marked stems. Skid and haul all felled stems that meet the product and utilization standards as per product bid. Select non-merchantable, operational trees will require removal to accommodate equipment. This will be discussed by the Sale Administrator during the pre-operations meeting.
   - In harvest unit 4, fell, skid, and haul all jack pine, aspen, scrub oak, and orange marked stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   - In harvest unit 1, reserve and leave undamaged all non-marked stems.
   - In harvest unit 2, reserve and leave undamaged all species stems in residual rows.
   - In harvest unit 3, reserve and leave undamaged all non-marked red pine and jack pine stems.
   - In harvest unit 4, reserve and leave undamaged all white pine and non-marked red pine stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   - In harvest unit 1, sheared stems shall be limbed and topped at the stump prior to product skidding or forwarding.
   - In harvest units 2, 3, and 4, all harvesting operations shall be limited to short-wood/cut-to-length operations only. Sheared stems shall be limbed, topped, and processed at the stump prior to product forwarding.
   - One landing location is permitted as designated.
   - Access road system shall be utilized for product decked.
   - In harvest unit 4, “Slaishing Maintenance”.

F. ACCESS AND ROADS -
   - No new access roads shall be constructed.
   - The total length of the existing access road system is approximately 6,000 feet.
   - Portions may require minimal “Class 3” reconstruction before use.

TRACT 16-20 (BUCKLEY TABLE SCRAPS) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   - Harvest unit 1 has a clear-cut harvest prescription with an estimated average residual basal area of 10ft².
   - Harvest unit 2 has a shelterwood harvest prescription with an estimated average residual basal area of 55ft².
   - Harvest unit 3 has a seed tree harvest prescription with an estimated average residual basal area of 25ft².

B. SEASONAL RESTRICTIONS -
   - All harvesting operations are not restricted by season or time of the year.

C. TREES DESIGNATED FOR CUTTING -
   - In harvest unit 1, fell, skid, and haul all non-marked red maple, red oak, sugar maple, aspen, scrub oak, black ash, red pine, and balsam fir stems that meet the product and utilization standards as per product bid.
   - In harvest unit 2, fell, skid, and haul all red maple, red oak, sugar maple, aspen, scrub oak, black ash, jack pine, balsam fir, and orange marked stems that meet the product and utilization standards as per product bid.
   - In harvest unit 3, fell, skid, and haul all non-marked red maple, red oak, sugar maple, aspen, scrub oak, black ash, red pine, white pine, jack pine, and balsam fir stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   - In harvest unit 1, reserve and leave undamaged all jack pine, white pine, and white birch stems; and all green marked stems.
   - In harvest unit 2, reserve and leave undamaged all non-marked red pine and with pine stems; and advanced sub-merchantable while pine regeneration.
   - In harvest units 3, reserve and leave undamaged all white birch stems and all green marked stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   - "Slashling Maintenance" is required, excluding desirable advanced sub-merchantable while pine regeneration patches in harvest unit 2.
   - In harvest unit 2, operations shall minimize to the greatest extent possible any damage to advanced regeneration.
   - Two skid trail crossings shall be constructed as designated. All equipment operation and skidding in these portions of the sale area shall be limited to these crossings.
   - Three skid trails shall be constructed as designated. All equipment operation and skidding in these portions of the sale area shall be limited to these trails.
   - The access road bisects a wildlife opening. Please note that wildlife opening contract conditions shall apply. Contact the Sale Administrator for further information.
   - Up to eight landing locations are permitted as designated.
   - Access road system may be utilized for product decking.

F. ACCESS AND ROADS -
   - The total length of the access road system is approximately 9,800 feet. Approximately 8,700 feet of existing access road and 1,100 feet of new access road.
   - Portions of the existing access road may require minimal "Class 3" reconstruction before use.
   - The entire 1,100 feet of new access road will require "Class 3" new construction.
   - An "Earth Berm" is located on the access road and shall be reinstalled at the same designated location.
   - An "Earth Berm" shall be installed at a location designated by the Sale Administrator on the new access road.

G. OTHER -
   - Note skidding distances.

TRACT 17-20 (BUNYANESQUE) -- SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Harvest unit 1 has a clear-cut harvest prescription with an estimated average residual basal area of 710 ft².
   ➢ Harvest unit 2 has a seed tree harvest prescription with an estimated average residual basal area of 2010 ft².

B. SEASONAL RESTRICTIONS -
   ➢ In harvest unit 1, all harvesting operations are not restricted by season or time of the year on an estimated 80% of the harvest area (uplands) and shall be limited to frozen ground conditions or unusually dry conditions only on an estimated 20% of the harvest area (lowlands). Contact the Sale Administrator for further information.
   ➢ In harvest unit 2, all harvesting operations are not restricted by season or time of the year on an estimated 30% of the harvest area (uplands) and shall be limited to frozen ground conditions or unusually dry conditions only on an estimated 70% of the harvest area (lowlands). Contact the Sale Administrator for further information.
   ➢ All road construction operations shall be limited to non-frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ In harvest unit 1, fell, skid, and haul all aspen, scrub oak, red maple, sugar maple, black ash, and miscellaneous species stems that meet the product and utilization standards as per product bid.
   ➢ In harvest unit 2, fell, skid, and haul all non-marked red maple, aspen, sugar maple, basswood, black ash, white ash, white birch, red oak, and miscellaneous species stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ In harvest unit 1, reserve and leave undamaged all red pine, white pine, balsam fir, basswood, white spruce, elm, and white birch stems.
   ➢ In harvest unit 2, reserve and leave undamaged all yellow birch, hemlock, white pine, and all green marked stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slashing Maintenance" is required for both harvest units.
   ➢ In harvest unit 2, operations shall minimize to the greatest extent possible any damage to advanced regeneration.
   ➢ Six landing locations are permitted as designated; 2 in harvest unit 1 and 4 in harvest unit 2.
   ➢ Access road system may be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ The access road is gated.
   ➢ The total length of the access road system is approximately 23,035 feet. Approximately 19,285 feet of existing access road and 3,750 feet of new access road.
   ➢ 6,085 feet of existing "Class 3" access road may require minimal "Class 3" reconstruction before use.
   ➢ 13,200 feet of existing "Class 3" access road will require "Class 1" upgraded construction as designated.
   ➢ 3,000 feet of new access road will require "Class 3" new construction.
   ➢ 750 feet of new access road will require "Class 1" new construction.
   ➢ Ten permanent "Culvert Crossings" shall be constructed as designated. Please see contract attachment.
   ➢ One temporary "Timber Bridge Crossing" shall be constructed. Please see contract attachment.

G. OTHER -
   ➢ 3-year term of contract.
   ➢ Note substantial road building requirements requiring adequate road building equipment and capability.
   ➢ Internal reserve/exclusion areas that are marked with red paint at or near Diameter at Breast Height (DBH) are designated as equipment restriction zones.

TRACT 23-20 (ST CROIX TRAIL) – SUPPLEMENTAL REQUIREMENTS

The following terms and conditions supplement those provided in the Douglas County Timber Sale Contract:

A. PRESCRIPTION -
   ➢ Harvest unit 1 has a clear-cut with reserves harvest prescription with an estimated average residual basal area of 10ft².
   ➢ Harvest unit 2 has a seed tree harvest prescription with an estimated average residual basal area of 26ft².
   ➢ Harvest unit 3 has a seed tree harvest prescription with an estimated average residual basal area of 30ft².

B. SEASONAL RESTRICTIONS -
   ➢ All harvesting operations shall be limited to frozen ground conditions only.

C. TREES DESIGNATED FOR CUTTING -
   ➢ In harvest units 1 and 2, fell, skid, and haul all black ash, red maple, aspen, scrub oak, black spruce, balsam fir, and miscellaneous species stems that meet the product and utilization standards as per product bid.
   ➢ In harvest unit 3, fell, skid, and haul all red maple, aspen, scrub oak, black ash, black spruce, balsam fir, and tamarack stems; and all marked red pine and white pine stems that meet the product and utilization standards as per product bid.

D. TREES DESIGNATED FOR LEAVING -
   ➢ In harvest unit 1, reserve and leave undamaged all red pine, white pine and white spruce stems.
   ➢ In harvest unit 2, reserve and leave undamaged all cedar, yellow birch, red pine, white pine, and white spruce stems.
   ➢ In harvest unit 3, reserve and leave undamaged all white spruce stems; and all non-marked red pine and white pine stems.

E. HARVEST AND OPERATIONAL REQUIREMENTS -
   ➢ "Slashing Maintenance" is required for all harvest units.
   ➢ Three skid trail "Freeze Down Crossings" shall be constructed as designated. All equipment operation and skidding in these portions of the sale area shall be limited to these crossings. The sale administrator will layout and flag in the locations of these crossings at the time of the pre-operations meeting.
   ➢ The access roads bisect four wildlife openings. Please note that wildlife opening contract conditions shall apply. Contact the Sale Administrator for further information.
   ➢ Six landing locations are permitted as designated,1 in harvest unit 1, 4 in harvest unit 2, and 1 in harvest unit 3.
   ➢ Access road system may be utilized for product decking.

F. ACCESS AND ROADS -
   ➢ The total length of the access road system is approximately 7,600 feet. Approximately 8,300 feet of existing access road and 1,300 feet of new access road.
   ➢ Portions of the existing access road may require minimal "Class 3" reconstruction before use.
   ➢ The entire 1,300 feet of new access road will require "Class 3" new construction.
   ➢ Portions of the existing and new access roads may require freeze down before use.
   ➢ Two "Earth Berms" shall be installed as designated.
   ➢ Spike Loop is a County Forest Road.

G. OTHER -
   ➢ Note skidding distances.
