

**Routes to Recovery Grants** provide \$200 million in flexible grants for local government's unbudgeted expenditures incurred this year due to the COVID-19 pandemic, that have not already been covered through existing State of Wisconsin virus response efforts. Grants will cover reimbursements for:

- Emergency operation activities, including those related to public health, emergency services, and public safety response
- Purchases of personal protective equipment
- Cleaning/sanitizing supplies and services, including those related to elections administration
- Temporary isolation housing for infected or at-risk individuals
- Testing and contact tracing costs above those covered by existing State programs
- FMLA and sick leave for public health and safety employees to take COVID-19 precautions
- Meeting local match requirements for expenses submitted for reimbursement by FEMA, to the extent permitted by federal law

The determination of a local government's **Routes to Recovery Grant** amount is a formula based on the jurisdiction's population, as well as the priority of providing Wisconsin's units of local government no less than \$5,000, regardless of size of the population.

\$10 million of **Routes to Recovery Grants** have also been set aside for Wisconsin's Tribal Partners.

**Routes to Recovery Grant Allocation Amounts for Wisconsin's Units of Local Government**

Reminder: The **Routes to Recovery Grants** are on-top of the \$1 Billion in resources Governor Evers has already allocated for the state-wide response to COVID-19. These resources include the distribution of testing supplies, PPE, contact tracing, and other valuable resources to communities across the state.
