- 30-49 (21.35%)
- 50-69 (21.05%)
- 70+ (6.43%)

Total Confirmed COVID-19 Cases

- 342
- 13
- 0
- 0

89% have recovered

Key Points:

* Public Health has not seen a surge in positive cases among school-age children but continues to monitor illness and absences closely.

* The number one way to avoid quarantine is to maintain a 6-foot physical distance from others whenever possible.

COVID-19 ASSOCIATED HOSPITALIZATION RELATED TO UNDERLYING MEDICAL CONDITIONS

Data has shown that racial and ethnic minority groups with the referenced conditions are at even higher risk for severe COVID-19 illness. Race and ethnicity are risk markers for other underlying conditions that impact health — including socioeconomic status, access to health care, and increased exposure to the virus due to occupation (e.g., frontline, essential, and critical infrastructure workers).

*Conditions include asthma, obesity, diabetes, chronic kidney disease, severe obesity, coronary artery disease, history of stroke and COPD.
